VICTOR ABA

Mobile App Developer (React Native) | Frontend Engineer (React, Next.js)

@ abavictor07@gmail.com   🔗 linkedin.com/in/victor-aba   📍 Nigeria

SUMMARY

I am a React Native Mobile Engineer with 2+ years of experience building scalable, high-performance cross-platform applications. I specialize in developing production-ready mobile apps, integrating RESTful APIs, optimizing performance, and implementing structured state management.

With a strong foundation in React and Next.js, I bring deep understanding of component architecture, reusable systems, and modern JavaScript (ES6+) to mobile development. I thrive in remote teams, collaborating with designers and backend engineers to deliver user-focused mobile products.

SKILLS

React Native (CLI & Expo)	React	Cross-Platform Mobile Development
Mobile App Performance Optimization	Next.js	Gmail	GitHub
App Store / Play Store Deployment	CI/CD	Agile /Scrum	TypeScript
RESTful API Integration	Responsive Web	Tailwind	Google Firebase
JavaScript	Unit testing	Git	Firebase	State Management
Context API	Zustand

KEY ACHIEVEMENTS

⚡ **HNG Internship Finalist**
Ranked among top finalists by consistently delivering high-quality frontend solutions under tight deadlines

📱 **ContentQ app**
ContentQ – A mobile app that is designed to help content creators, digital marketers, and personal brand builders organize and manage content ideas in one centralized platform.

Developed a solution that eliminates scattered notes, voice recordings, screenshots, and draft ideas by consolidating all content planning resources into a single, structured system.

📱 **FinWise — Personal Finance Management App**
application (v1.0.0) focused on personal finance management. It targets both iOS and Android platforms and is built with a modern tech stack.

Key Features
Authentication — Full sign-up/login flow with email verification, password reset, and biometric security (fingerprint + PIN)
Wallet & Balance — Track account balance and wallet information
Expense Tracking — Categorized spending across 7+ categories with an add-expense form
Savings Goals — Dedicated savings management section
Analytics & Charts — Visual financial analytics with calendar filtering and search
Transactions — Transaction history and money transfers
Notifications — In-app notification system
Profile Management — Editable user profile with security and settings

TRAINING / COURSES

Mobile development   **Front-end development**

EDUCATION

Computer science
University of Ilorin
📅 06/2016 - 06/2021

EXPERIENCE

Frontend Developer
SEDL, Inc
📅 01/2024   📍 Remote
Remote software development company specializing in SaaS solutions
- Built modular and reusable UI components using React, Next.js, and TypeScript for SaaS applications
- Improved application performance by ~25% through code-splitting and optimized state management
- Integrated REST APIs and collaborated with backend engineers and designers

Mobile Developer (React Native)
ContentQ (HNG Internship)
📅 01/2024 - 12/2024   📍 Remote
An internship program for aspiring software developers
- Designed and developed key mobile app screens and features using React Native.
- Implemented user flows for creating, saving, and organizing content ideas
- Contributed to a production-ready app used by real users

Frontend Engineer
TechNova Solutions
📅 01/2024 - 12/2024   📍 Remote
A technology solutions company focusing on frontend development
- Developed responsive web applications using React, TailwindCSS, and Firebase
- Implemented authentication and API integrations
