PROFESSIONAL SUMMARY

Results-driven Mobile Developer with 2+ years of experience building high-quality, cross-platform mobile applications using React Native and Flutter. Proven track record delivering scalable, user-focused solutions for both iOS and Android platforms. Proficient in JavaScript, TypeScript, RESTful API integration, and state management. Passionate about clean, maintainable code and continuously improving application performance and reliability throughout the full software development lifecycle.

TECHNICAL SKILLS

React Native	TypeScript / JavaScript	Flutter	Firebase
RESTful API Integration	iOS & Android Dev	Git / GitHub	Debugging & Testing

WORK EXPERIENCE

Mobile Developer (React Native) | ContentQ — HNG Internship

January 2024 – December 2024 • Remote

- Architected and delivered cross-platform mobile applications using React Native, maintaining a consistent UX across iOS and Android for 500+ beta users.
- Engineered modular, reusable components that reduced feature development time by approximately 30% across multiple product sprints.
- Integrated RESTful APIs, payment gateways, and third-party SDKs, ensuring secure and high-performance mobile experiences.
- Led performance optimization initiatives — reducing app startup time by 40% and cutting memory consumption through efficient rendering strategies.
- Collaborated within an Agile cross-functional team across the full SDLC, from requirements gathering and technical design through deployment and monitoring.
- Ranked among top finalists in the HNG Internship by consistently delivering high-quality frontend solutions under tight deadlines.

Frontend Developer | SEDL, Inc

January 2024 – December 2024 • Remote

- Developed responsive web applications using modern JavaScript frameworks, ensuring seamless functionality across desktop, tablet, and mobile devices.
- Optimized website performance through code refactoring, lazy loading, and efficient asset management, improving page load times by 35%.
- Implemented reusable component libraries following industry best practices, enhancing scalability and reducing development time across multiple projects.

- Conducted code reviews, debugging, and testing to ensure high-quality, cross-browser-compatible applications meeting organizational accessibility standards.
- Collaborated closely with UI/UX designers and backend engineers to translate business requirements into intuitive, high-performing user interfaces.

Frontend Engineer | TechNova Solutions

January 2024 – December 2024 • On-site

- Engineered and maintained scalable web applications using modern frontend frameworks, delivering seamless user experiences across desktop and mobile platforms.
- Developed reusable component-based architecture and design systems that improved code maintainability and accelerated development cycles.
- Implemented robust CI/CD workflows, automated testing, and accessibility standards, ensuring reliable and maintainable software delivery.
- Optimized application performance through efficient state management, code splitting, and lazy loading, resulting in measurable improvements in page speed and engagement.

KEY PROJECTS

FinWise — Personal Finance App React Native • TypeScript • Firebase

- Built a cross-platform personal finance app targeting iOS and Android with biometric authentication (fingerprint/Face ID) for enhanced user security.
- Designed and implemented a transaction management system supporting income/expense tracking, savings goals, and a 7-category spending breakdown.
- Created interactive analytics dashboards with calendar filtering to visualize financial trends and spending habits.
- Delivered full feature set including wallet management, in-app notifications, money transfers, and editable user profiles.

ContentQ — Content Management App React Native • Offline-first architecture

- Built a cross-platform content management app to help creators, marketers, and brand builders consolidate scattered notes, recordings, and draft ideas into one structured system.
- Developed an offline-first architecture ensuring seamless access without internet connectivity, with background cloud synchronization.
- Implemented secure user authentication and optimized data storage processes for improved performance and reliability.

VisaCheckNG — Visa Eligibility Platform Web • Mobile-responsive

- Designed and developed a visa eligibility and checklist platform to simplify travel document preparation for users.
- Built dynamic questionnaire workflows that generate personalized visa requirements based on user inputs.
- Implemented automated document generation features and responsive UI optimized for both mobile and web accessibility.

EDUCATION

B.Sc. Computer Science

University of Ilorin • Graduated June 2016 • Ilorin, Nigeria
